

NEW FEATURES FOR DP41 METER WITH VERSION -04 thru -06 PROGRAM

FOR DP41-E / DP41-RTD / DP41-S /
DP41-TC / DP41-U

ADDENDUM

M1297A/0206

I. IDENTIFICATION OF PROGRAM VERSION:

- MENU L1 CNF:
LIC.5 = 0 Display valley reading when ►/MIN button is pressed.
LIC.5 = 1 Display microprocessor revision when ►/MIN button is pressed.
- For Serial Communication use command prefix and suffix: "U03".

II. Direct reading offset **RDG OF** now has programmable decimal point position. This makes the decimal point independent of the display decimal point and allows larger offset values.

III. Meter now stores all scale and offset values for **IN. SC. OF**, **RD. SC. OF**, and **OT. SC. OF**. The meter will display previously input values when entering these menus.

If system decimal point changes, all values will be modified accordingly; if overflow occurs meter will flash that parameter with 999999.

IV. FOR DP41-E / DP41-S / DP41-U

MENU RDG. CNF:

RDG.6 = 0 Disable reading scale and offset (uses scale of 1.0000 and offset of 000000).

RDG.6 = 1 Enables reading scale and offset (uses scale and offset values entered by user).

V. FOR DP41-E / DP41-U

External "TARE" is now available in "PROCESS" mode.
