SYMBOLS

The following electrical symbols are used in this manual:

- AC
- DC
- Diode
- Capacitor
- Beeper
- EL button
- Capacitor plug
- Important safety information
**WARNING**

To ensure that the meter is used safely, follow all safety and operating instructions in this manual. If the meter is not used as described in this manual, the safety features of the meter might be impaired.

1. Don't touch the metal part of the test leads to prevent an electrical shock.
2. Don't use the meter, if the rear cover is unrefitted.
3. Don't touch both poles of the test leads, during the measuring process.
4. Ensure the range switch was set to the proper range of functional positions.
5. Remove the battery, if the meter is not used for a long time.

mA

mA

mV

OFF
DC/AC CURRENT MEASUREMENT

1. Set the range switch to the desired mA position. (Set to mA or mA in case of HHM 95).

2. Insert the red test lead into "mA" input connector and the black test lead into "COM" input connector (into "10A" input connector in case of higher than 200 mA measurement).

3. Connect the leads to the device or circuit to be measured, and read the data on the display.
DC/AC V MEASUREMENT

1. Set the range switch to the desired DCV or ACV position.
2. If you can't determine the correct position, set the range switch to the highest range within Voltage range, and reduce it gradually until the satisfactory reading is obtained.
3. Insert the red test lead into "V" input connector and the black test lead into "COM" input connector.
4. Connect the test leads to the device or circuit to be measured, and read the data on the LCD display.
5. Autorange can be changed into manual operation by pushing the R-H button in autorange multimeters. (HHM 97, HHM 97EL)
MEASURING RESISTANCES AND TESTING CONTINUITY

1. Insert the black test lead into "COM" input connector, and the red test lead into the input connector marked "Ω". Turn off power to the circuit under test.

2. Set the range switch to the range marked "Ω" in measuring resistance, to "X10" in testing continuity.

3. Touch the probes to the test points.

In ohms, read the resistance on the display.

In testing continuity, beeper sounds continuously if continuity exists (resistance < 100 Ω)
**DIODE TEST**

1. Set the range switch to Ω position.

2. Insert the red test lead into Ω input connector, and the black test lead into "COM" input connector.

3. Touch the red test lead to the anode of the diode, and the black test lead to the cathode of the diode.

4. Read forward voltage on digital display.

5. Reverse the test lead if the display shows "1" or "OL".

6. If it still shows "1" or "OL" or "000" on the display, that means the diode is damaged.

* Transistor junctions E, B, C, may also be determined by a similar method described above, as the emitter-base and base-collector junctions are also P-N junction diodes.
1. Set the switch to "NPN" or "PNP" position. (It depends on the specification of the individual transistor.)
2. Plug the leads of the tested transistor into the correct E, B, C, holes in the transistor test socket.
3. Read the Hfe value on the display.
CAPACITANCE MEASUREMENT

1. Set the range switch to "F" position.
2. Discharge any capacitors before testing.
3. Insert the capacitor leads into the capacitor test socket. Because there are two groups of holes, one lead must be inserted into the hole of one of the two groups, and the other lead into the hole of the other group.
4. Read the capacitance value on the display.
MAINTENANCE

1. BATTERY REPLACEMENT,
   (1) Replace the battery as the low battery indication "\[\]
       appears on the display.
   (2) Remove two screws located near the bottom of the rear cover. Remove the
       rear cover.
   (3) Remove the battery from the meter and replace it with a new one.
   (4) Restore the rear cover and tighten the screws.

2. FUSE REPLACEMENT,
   (1) Remove test leads from the meter.
   (2) Remove two screws located near the bottom of the rear cover. Remove the
       rear cover.
   (3) Remove the fuse and replace it with a new fuse of the same rating.
   (4) Restore the rear cover and tighten the screws.
SPECIFICATIONS

GENERAL:
OPERATION ENVIRONMENT: 23±5°C, relative humidity above 75% RH

DC voltage:
RANGE: 200m/2/20/200/600V
320m/3.2/32/320/600V (HHM 97, HHM 97EL)
ACCURACY: ± (2.0% RDG + 2 DGT)
INPUT IMPEDENCE: 10MΩ
OL. PROTECTION: AC/DC 600V

AC voltage:
RANGE: 200/200/600V
3.2/32/320/600V (HHM 97, HHM 97EL)
ACCURACY: ± (2.5% RDG + 5 DGT)
INPUT IMPEDENCE: 4.5MΩ (HHM 93)/10M (HHM 95, HHM 97, HHM 97EL)
OL. PROTECTION: AC/DC 600V
DCA:
RANGE: 2m/20m/200m/2000mA; 10A
32m/320mA; 10A (HHM 97, HHM 97EL)
ACCURACY: ±(2.0% RDG + 3DGTS) for mA
±(3.0% RDG + 4DGTS) for 10A
OL. PROTECTION: 500mA/250V (HHM 93, HHM 95, HHM 97) fuse
10A/600V (HHM 97, HHM 97EL) fuse

ACA:
RANGE: 20mA; 10A (HHM 95); 32m/320mA; 10A (HHM 97, HHM 97EL)
ACCURACY: ±(2.5% RDG + 5DGTS) for mA
±(3.5% RDG + 5DGTS) for 10A
OL. PROTECTION: 500mA/250V (HHM 95) fuse
10A/600V (HHM 97, HHM 97EL) fuse
DIODE TEST:
TEST CURRENT: (1.0±0.6)mA
TEST VOLTAGE: Max 3.2V
OL. PROTECTION: AC/DC 500V PTC

CONTINUITY BEEPER:
THRESHOLD RESISTANCE:<100Ω
RESPONSE TIME:<10ms
OL. PROTECTION:AC/DC 500V PTC

* The (model number)s following the data indicate the specifications for some specified models. Those without (model number) indication mean that they are general specifications for all models.

*HMM 97, HMM 97EL are both auto/menu operation modes. HMM 97EL has backlight for use in the dark.
WARRANTY

OMEGA warrants this unit to be free of defects in materials and workmanship and to give satisfactory service for a period of 13 months from date of purchase. OMEGA Warranty adds an additional one (1) month grace period to the normal one (1) year product warranty to cover handling and shipping time. This ensures that OMEGA's customers receive maximum coverage on each product. If the unit should malfunction, it must be returned to the factory for evaluation. OMEGA’s Customer Service Department will issue an Authorized Return (AR) number immediately upon phone or written request. Upon examination by OMEGA, if the unit is found to be defective it will be repaired or replaced at no charge. However, this WARRANTY is VOID if the unit shows evidence of having been tampered with or shows evidence of being damaged as a result of excessive corrosion, current, heat, moisture or improper specification, misapplication, misuse or other operating conditions outside of OMEGA’s control. Components which wear or which are damaged by misuse are not warranted. This includes contact points, fuses and tracks.

OMEGA is glad to offer suggestions on the use of its various products. Nevertheless, OMEGA only warrants that the parts manufactured by it will be as specified and free of defects.

OMEGA MAKES NO OTHER WARRANTIES OR REPRESENTATIONS OF ANY KIND WHATSOEVER, EXPRESSED OR IMPLIED, EXCEPT THAT OF TITLE AND ALL IMPLIED WARRANTIES INCLUDING ANY WARRANTY OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE HEREBY DISCLAIMED.

LIMITATION OF LIABILITY: The remedies of purchaser set forth herein are exclusive and the total liability of OMEGA with respect to this order, whether based on contract, warranty, negligence, indemnification, strict liability or otherwise, shall not exceed the purchase price of the component upon which liability is based. In no event shall OMEGA be liable for consequential, incidental or special damages.

Every precaution for accuracy has been taken in the preparation of this manual; however, OMEGA ENGINEERING INC. neither assumes responsibility for any omissions or errors that may appear nor assumes liability for any damages that result from the use of the products in accordance with the information contained in the manual.

SPECIAL CONDITION: Should this equipment be used in or with any nuclear installation or activity, purchaser will indemnify OMEGA and hold OMEGA harmless from any liability or damage whatsoever arising out of the use of the equipment in such a manner.
RETURN REQUESTS / INQUIRIES

Direct all warranty and repair requests/inquiries to the OMEGA Customer Service Department. BEFORE RETURNING ANY PRODUCT(S) TO OMEGA, PURCHASER MUST OBTAIN AN AUTHORIZED RETURN / RAI NUMBER FROM OMEGA'S CUSTOMER SERVICE DEPARTMENT (IN ORDER TO AVOID PROCESSING DELAYS). The assigned RAI number should then be marked on the outside of the return package and on any correspondence.

The purchaser is responsible for shipping charges, freight, insurance and proper packaging to prevent breakage in transit.

FOR WARRANTY RETURNS, please have the following information available BEFORE contacting OMEGA:

1. P.O. number under which the product was PURCHASED.
2. Model and serial number of the product under warranty, and
3. Repair instructions and/or specific problems relative to the product.

FOR NON-WARRANTY REPAIRS, consult OMEGA for current repair charges. Have the following information available BEFORE contacting OMEGA:

1. P.O. number to cover the COST of the repair.
2. Model and serial number of product, and
3. Repair instructions and/or specific problems relative to the product.

OMEGA's policy is to make running changes, not model changes, whenever an improvement is possible. This affords our customers the latest in technology and engineering. OMEGA is a registered trademark of OMEGA ENGINEERING, INC.

Where Do I Find Everything I Need for Process Measurement and Control?
OMEA...Of Course!

HEATERS
- Heating Cable
- Cartridge & Strip Heaters
- Immersion & Band Heaters
- Flexible Heaters
- Laboratory Heaters

PRESSURE/STRAIN FORCE
- Transducers & Strain Gauges
- Load Cells & Pressure Gauges
- Displacement Transducers
- Instrumentation & Accessories

FLOW/LEVEL
- Rotameters, Gas Mass Flowmeters & Flow Computers
- Air Velocity Indicators
- Turbine/Paddlewheel Systems
- Totalizers & Batch Controllers

TEMPERATURE
- Thermocouple, RTD & Thermistor Probes, Connectors, Panels & Assemblies
- Wire Thermocouple, RTD & Thermistor
- Calibrators & Ice Point References
- Recorders, Controllers & Process Monitors
- Infrared Pyrometers

ENVIRONMENTAL MONITORING AND CONTROL
- Metering & Control Instrumentation
- Refractometers
- Pumps & Tubing
- Air, Soil & Water Monitors
- Industrial Water & Wastewater Treatment
- pH, Conductivity & Dissolved Oxygen Instruments

pH/CONDUCTIVITY
- pH Electrodes, Testers & Accessories
- Benchtop/Laboratory Meters
- Controllers, Calibrators, Simulators & Pumps
- Industrial pH & Conductivity Equipment

DATA ACQUISITION
- Data Acquisition & Engineering
- Software
- Communications-Based Acquisition Systems
- Plug-in Cards for Apple, IBM & Companiles
- Data Logging Systems
- Recorders, Printers & Plotters
