The terminal blocks on the front of the enclosure are removable. To remove the terminal block pull straight out.

**Input Guard Model OMA-VM500-6HV**
The model OMA-VM500-6HV accepts a/c voltages from 90vac to 135vac. Input current is limited internally by a 43k resistor. Each input circuit is isolated from the other and from the units power source.

**Testing the Inputs**
To verify that the inputs are recognized by the OMA-VM500-6HV, remove the cover. Each input has an LED to indicate if an input is active or not. The LED will turn on whenever 120vac is applied.

**Surge Protection**
It is recommended that a surge suppressor be used for the wall plug power adapter and the phone line.
