It is the policy of OMEGA Engineering, Inc. to comply with all worldwide safety and EMC/EMI regulations that apply. OMEGA is constantly pursuing certification of its products to the European New Approach Directives. OMEGA will add the CE mark to every appropriate device upon certification.

The information contained in this document is believed to be correct, but OMEGA accepts no liability for any errors it contains, and reserves the right to alter specifications without notice.

WARNING: These products are not designed for use in, and should not be used for, human applications.
OS150 USB 2.2 Series non-contact infrared sensors measure temperatures from 45°C to 2000°C and provide a linear 0 to 20 or 4 to 20 mA output. The signal is compatible with almost any indicator, controller, recorder, data logger etc., without the need for special interfacing or signal conditioning. They are especially suited to low-emissivity targets such as steel rollers and other metal surfaces, even at low temperatures.

**SPECIFICATION**

**GENERAL**

| Environmental Rating    | IP65                                      |
| Ambient Temperature Range | 0°C to 70°C                              |
| Relative Humidity       | 95% maximum non-condensing               |
| Electromagnetic Compatibility | EN61326-1:2006 Industrial (analogue output only) |
|                         | EN61326-1:2006 Basic (USB)               |

* Object temperature > T_min (see graph of Minimum Measurable Temperature on page 9)
ACCESSORIES
A range of accessories to suit different applications and industrial environments is available. These may be ordered at any time and added on-site. The accessories consist of the following parts.
- Fixed mounting bracket
- Adjustable mounting bracket
- Air purge collar
- Laser sighting tool

OPTIONS
The following options are available. Options are factory installed and must be ordered with the OS150 USB 2.2 sensor.
- Air/water cooled housing
- Certificate of calibration
- Longer cable (30 m max.)

OPTICAL CHART
The optical chart below indicates the nominal target spot diameter at any given distance from the sensing head and assumes 90% energy.
INSTALLATION
The installation process consists of the following stages:
- Preparation
- Mechanical installation
- Electrical installation

Please read the following sections thoroughly before proceeding with the installation.

PREPARATION
Ensure that the sensor is positioned so that it is focused on the target only.

DISTANCE AND SPOT SIZE
The size of the area (spot size) to be measured determines the distance between the sensor and the target. The spot size must not be larger than the target. The sensor should be mounted so that the measured spot size is smaller than the target.

REFLECTIONS
The sensor must be installed in a location where energy from lamps, heaters and sunlight cannot be reflected from the target into the lens. The use of shields may help in this respect. For further information and assistance contact Omega.

AMBIENT TEMPERATURE
The sensor is designed to operate in ambient temperatures from 0°C to 70°C. For ambient temperatures above 70°C, an air/water-cooled housing will be required.

Avoid thermal shock. Allow 20 minutes for the unit to adjust to large changes in ambient temperature.

ATMOSPHERIC QUALITY
Smoke, fumes or dust can contaminate the lens and cause errors in temperature measurement. In these types of environment the air purge collar should be used to help keep the lens clean.
ELECTRICAL INTERFERENCE
To minimise electromagnetic interference or ‘noise’, the sensor should be mounted away from motors, generators and such like.

WIRING
Check the distance between the sensor and the indicating/controlling device. If necessary, the OS150 USB 2.2 sensor can be ordered with a longer output cable attached.

MECHANICAL INSTALLATION
All sensors come with a 1 m cable and a mounting nut. The sensor can be mounted on brackets or cut outs of your own design, or you can use the fixed and adjustable mounting bracket accessories which are shown below.

AIR/WATER COOLED HOUSING
The air/water cooled housing shown below allows the sensor to withstand high ambient temperatures. It is equipped with two 1/8” BSP fittings. Water temperature should be 10°C to 27°C for efficient cooling. Chilled water below 10°C is not recommended. To avoid condensation, the air purge collar, supplied with the cooled housing, should be used.
ELECTRICAL INSTALLATION
The sensor to electronics cable is a 1 m PTFE cable. One end is attached, at the factory, to the sensor head. The other end has two pairs of wires and a shield (ground) wire.

WIRING
The OS150 USB 2.2 sensor can be used in three different ways as shown below. To use the analogue output, connect the OS150 USB 2.2 sensor to the controller/indicator with the 24 V DC power supply using the following table and connection diagram as a guide. The maximum loop impedance is 900 ohms. Note: The OS150 USB 2.2 sensor must be grounded at only one point, either the cable shield or the sensor housing.

Alternatively, to use the USB output, connect the OS150 USB 2.2 sensor to a PC using the cable provided. No external power supply is required when using the USB output. The OS150 USB 2.2 sensor can also be used with both the analogue output and USB connected, provided that the negative terminal of the 24 V DC power supply being used is not grounded. Note: The OmegaSoft software must be installed before connecting the sensor to a PC.

AIR PURGE COLLAR
The air purge collar below is used to keep dust, fumes, moisture, and other contaminants away from the lens. It must be screwed in fully. Air flows into the 1/8” BSP fitting and out of the front aperture. Air flow should be no more than 5 to 15 litres/min.

Clean or ‘instrument’ air is recommended.
OMEGASOFT SOFTWARE
SYSTEM REQUIREMENTS
- OmegaSoft software is designed to run under Windows. Suitable versions are Windows 2000, Windows XP, Windows Vista and Windows 7.
- The recommended minimum computer specification is:
  Intel Pentium processor
  VGA display with 640x480 resolution
  USB 2.0 port

INSTALLATION
1. Insert the disk provided
2. Installer should run automatically (if not, select the appropriate drive and double click on Setup.exe)
3. Follow the on-screen instructions
NOTE Do not connect the OS150 USB 2.2 Sensor to the PC before the software is installed

CONNECTING THE OS150 USB 2.2 SENSOR TO A PC
1. Connect the circular connector on the USB cable provided to the OS150 USB 2.2 sensor
2. Connect the USB A connector on the USB cable provided to an available USB 2.0 port
3. Double click on the OmegaSoft desktop icon

CONFIGURATION
- Setting Temperature Units
  Temperature units can be set on the main temperature panel by pressing °C or °F.
• Setting Output Processing
The temperature range for the analogue output, the averaging period and the peak/valley hold processing can be set by using the main program menu to select:
[Setup] → [Output Processing]
The temperatures corresponding to the lower and upper limits of the analogue output can then be set as follows:

<table>
<thead>
<tr>
<th>Model</th>
<th>Lower Limit</th>
<th>Upper Limit</th>
<th>Minimum Span</th>
<th>Maximum Span</th>
</tr>
</thead>
<tbody>
<tr>
<td>LT</td>
<td>45°C</td>
<td>300°C</td>
<td>100°C</td>
<td>255°C</td>
</tr>
<tr>
<td>PT</td>
<td>100°C</td>
<td>400°C</td>
<td>100°C</td>
<td>300°C</td>
</tr>
<tr>
<td>MT</td>
<td>250°C</td>
<td>1000°C</td>
<td>100°C</td>
<td>750°C</td>
</tr>
<tr>
<td>HT</td>
<td>450°C</td>
<td>2000°C</td>
<td>100°C</td>
<td>1550°C</td>
</tr>
</tbody>
</table>

The output type can be selected as either 0 mA to 20 mA or 4 mA to 20 mA.

To minimise the the effects of temperature fluctuations, noise etc on the output signal, the averaging period can be set between 0 and 60 seconds.

If required, Hold Processing can be applied by setting hold mode to Peak Hold or Valley Hold and setting a hold period between 0 and 1200 seconds.

• Setting Target Emissivity
To set an emissivity value for the OS150 USB 2.2 sensor, use the main program menu to select:
[Setup] → [Emissivity]
Emissivity can then be set to a value between 0.1 and 1.0, or selected from a pre-set list of materials by selecting [Data].

MINIMUM MEASURABLE TEMPERATURE (OS151-2USB-LT only)

Graph showing the minimum measurable object temperature ($T_{\text{min}}$), determined by surface emissivity ($\varepsilon$) and sensor temperature ($T_s$).

• Setting Reflected Temperature Compensation
To enable and set reflected temperature compensation, use the main program menu to select:
[Setup] → [Reflection Compensation]
Reflected temperature compensation can be enabled/disabled using [Compensate for Reflected Temperature], and when enabled the temperature value can be set between 45 and 2000°C, depending on the model selected.

To store the changes in the sensor’s memory, select [File] → [Save sensor processing parameters].
OPERATION
Once the sensor is in position and the appropriate power, air, water, and cable connections are secure, the system is ready for continuous operation by completing the following simple steps:

1. Turn on the power supply
2. Turn on the instrument or PC
3. Read / monitor the temperature

IMPORTANT
Be aware of the following when using the sensor:

• If the sensor is exposed to significant changes in ambient temperature (hot to cold, or cold to hot), allow 20 minutes for the temperature to stabilise before taking or recording measurements.
• Do not operate the sensor near large electromagnetic fields (e.g. around arc welders or induction heaters) or where energy from lamps, heaters and sunlight could be reflected into the lens.
  Electromagnetic interference can cause measurement errors.
• Wire must be connected only to the appropriate terminals.

MAINTENANCE
Our customer service representatives are available for application assistance, calibration, repair, and solutions to specific problems. Contact our Service Department before returning any equipment. In many cases, problems can be solved over the telephone. If the sensor is not performing as it should, try to match the symptom below to the problem. If the table does not help, call Omega for further advice.

LENS CLEANING
Keep the lens clean at all times. Any foreign matter on the lens would affect measurement accuracy. Blow off loose particles (if not using the air purge accessory) with an air ‘puffer’.
OMEGA ENGINEERING, INC. warrants this unit to be free of defects in materials and workmanship for a period of **37 months** from date of purchase. OMEGA’s WARRANTY adds an additional one (1) month grace period to the normal three (3) year product warranty to cover handling and shipping time. This ensures that OMEGA’s customers receive maximum coverage on each product.

If the unit malfunctions, it must be returned to the factory for evaluation. OMEGA’s Customer Service Department will issue an Authorized Return (AR) number immediately upon phone or written request. Upon examination by OMEGA, if the unit is found to be defective, it will be repaired or replaced at no charge. OMEGA’s WARRANTY does not apply to defects resulting from any action of the purchaser, including but not limited to mishandling, improper interfacing, operation outside of design limits, improper repair, or unauthorized modification. This WARRANTY is VOID if the unit shows evidence of having been tampered with or shows evidence of having been damaged as a result of excessive corrosion; or current, heat, moisture or vibration; improper specification; misapplication; misuse or other operating conditions outside of OMEGA’s control. Components in which wear is not warranted, include but are not limited to contact points, fuses, and triacs.

OMEGA is pleased to offer suggestions on the use of its various products. However, OMEGA neither assumes responsibility for any omissions or errors nor assumes liability for any damages that result from the use of its products in accordance with information provided by OMEGA, either verbal or written. OMEGA warrants only that the parts manufactured by the company will be as specified and free of defects. OMEGA MAKES NO OTHER WARRANTIES OR REPRESENTATIONS OF ANY KIND WHATSOEVER, EXPRESSED OR IMPLIED, EXCEPT THAT OF TITLE, AND ALL IMPLIED WARRANTIES INCLUDING ANY WARRANTY OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE HEREBY DISCLAIMED. LIMITATION OF LIABILITY: The remedies of purchaser set forth herein are exclusive, and the total liability of OMEGA with respect to this order, whether based on contract, warranty, negligence, indemnification, strict liability or otherwise, shall not exceed the purchase price of the component upon which liability is based. In no event shall OMEGA be liable for consequential, incidental or special damages.

CONDITIONS: Equipment sold by OMEGA is not intended to be used, nor shall it be used: (1) as a “Basic Component” under 10 CFR 21 (NRC), used in or with any nuclear installation or activity; or (2) in medical applications or used on humans. Should any Product(s) be used in or with any nuclear installation or activity, medical application, used on humans, or misused in any way, OMEGA assumes no responsibility as set forth in our basic WARRANTY/DISCLAIMER language, and, additionally, purchaser will indemnify OMEGA and hold OMEGA harmless from any liability or damage whatsoever arising out of the use of the Product(s) in such a manner.

**RETURN REQUESTS/INQUIRIES**

Direct all warranty and repair requests/inquiries to the OMEGA Customer Service Department. BEFORE RETURNING ANY PRODUCT(S) TO OMEGA, PURCHASER MUST OBTAIN AN AUTHORIZED RETURN (AR) NUMBER FROM OMEGA’S CUSTOMER SERVICE DEPARTMENT (IN ORDER TO AVOID PROCESSING DELAYS). The assigned AR number should then be marked on the outside of the return package and on any correspondence. The purchaser is responsible for shipping charges, freight, insurance and proper packaging to prevent breakage in transit.

**FOR WARRANTY RETURNS**, please have the following information available BEFORE contacting OMEGA:
1. Purchase Order number under which the product was PURCHASED,
2. Model and serial number of the product under warranty, and
3. Repair instructions and/or specific problems relative to the product.

**FOR NON-WARRANTY REPAIRS**, consult OMEGA for current repair charges. Have the following information available BEFORE contacting OMEGA:
1. Purchase Order number to cover the COST of the repair,
2. Model and serial number of the product, and
3. Repair instructions and/or specific problems relative to the product.

OMEGA’s policy is to make running changes, not model changes, whenever an improvement is possible. This affords our customers the latest in technology and engineering.
