Device Overview
The Omega OM-CP-OCTPRO is a portable, multi-use industrial data logger with eight channels and a user-friendly touchscreen interface. This versatile logger measures and records temperature, current, voltage and pulse simultaneously and displays data in real time. The OM-CP-OCTPRO is compatible for use with many thermocouple, RTD or thermistor probes as well as a number of voltage output sensors, current switches, transmitters and transducers.

Versatility makes OM-CP-OCTPRO the perfect companion for industrial engineers, quality assurance professionals, compliance officers or automotive technicians. The OM-CP-OCTPRO is very easy to use and configure via the built-in capacitive touchscreen graphic display.

The OM-CP-OCTPRO is a powerful, independent tool. Unlike many other data loggers, the OM-CP-OCTPRO delivers an all-in-one data collection and monitoring solution that does not require a PC or any downloaded software for operation.

External Features
- **Power Button:** To power on and power off the device, hold down the Power button for 3 seconds.
- **Home Button:** The Home button will return the user to the home screen (details on page 6).
- **Input Ports:** The OM-CP-OCTPRO features 8 sensor channel inputs plus one alarm port and a ground (details on pages 3-4).
- **LCD Touchscreen:** 5 inch LCD capacitive touchscreen.
- **USB Port:** The OM-CP-OCTPRO has a built-in USB port for downloading data to a flash drive.
- **Power Input:** Charging port.
**Device Orientation**
The OM-CP-OCTPRO display can rotate 180 degrees depending on the desired orientation of the device. This option is available from the Settings menu under the Display section. *Please note: Power restart required in order to apply screen rotation.*

**Desktop Orientation**
For handheld and tabletop use, the inputs will be on the top. Note port number as it relates to device orientation.

**Wall Mount Orientation**
For wall mount use the unit will be rotated so that the inputs will be on the bottom.

**Tabletop Orientation**
The OM-CP-OCTPRO features a built-in kickstand on the back of the device for use on a flat surface.

**Device Ports**
The OM-CP-OCTPRO features 10 ports. Please refer to the images above for the port number as it relates to device orientation.

**Channels and Functions**
- Ports 1 thru 8 are sensor input channels (Temperature, Current or Voltage)
- Port 9 serves as an alarm output
- Port 10 serves as a ground for the device

**Frequency or Pulse Counter**
Can only be used on port 1

**3-Wire and 4-Wire PT100 RTD Sensors**
Use ports 1-2, 3-4, 5-6, or 7-8

**2-Wire PT100 RTD Sensors**
Can be used on ports 1-8
Sensor Types & Measurement Ranges
Each of the 8 input channels can be individually configured for the following types and sensor ranges.

<table>
<thead>
<tr>

Home Screen
The Home screen will display the following options when the Home button is selected.

- **Channel Configuration**: Configure parameters and options for each channel.
- **Real-Time**: Quickly view Real-Time data for all active channels.
- **Start Logging**: Start logging using current settings. (Stop logging if device is actively logging.)
- **Current Session**: View data from the current logging session as graph, tabular or real-time.
- **Data Storage**: View, Copy, Delete and Add notes to logged sessions.
- **Settings**: Access device preferences and options.

Stop Logging
The Start Logging icon will change to “Stop Logging” when device is recording.
First Time Use
Follow these steps when the device is powered up for the first time or if the battery has been removed or replaced.

1. **POWER BUTTON**
   Press and hold the Power Button for 3 seconds to power up the device.

2. **SCREEN READY**
   Wait for the device to initiate, you will see the Omega logo when complete.

3. **SELECT SCREEN ORIENTATION**
   For desktop use, inputs are facing upward.
   For wall mounted use, inputs are facing downward.

4. **SET UP INITIAL DATE AND TIME**
   Enter the local date and time to be used by the device and click Next to continue to Home screen.

5. When the device presents the Home screen it is ready to use.
**Channel Configuration**
When the Channel Configuration icon is selected, the device will display the screen shown below:

- **Channel 1-8:** Configures the type of channel input, units, engineering units (if applicable), alarms and user calibration adjustments.
- **Update:** Applies the current channel configuration to make the device ready to start logging or display real-time data.
- **File:** Loads previously saved channel configurations.
- **Save:** Saves the current channel configuration so it may be loaded and used later.
- **Disable All:** Clears the configuration of all channels, returning them to the default disabled status.
- **Cancel:** Cancels changes and then goes back to the Home screen.

**Channel Setup**
When the user selects a Channel, the device will display the Channel Setup screen with several options:

- **Disable** (Channel is not being used)
- **RTD** (RTD probe)
- **TC** (Thermocouple probe)
- **Voltage**
- **Current**
- **Thermistor** (Thermistor probe)
- **Pulse** (Only available on channel 1)
**Measurement Setup**

When the user selects a Measurement Parameter, the device will display the relevant options for that selection. Example shown are the Voltage options.

Select the **Measurement** button to display a pop-up screen of relevant measurement types to choose from.

**Measurement Units**

When the user selects the Units button, the device will display a pop-up menu of the relevant options for that selection. Example shown are the Voltage options.

**Engineering Units:** This will be an option to set up if the user selects the Voltage, Current or Pulse sensor (see details below and on page 9-10).
Engineering Units

Engineering Units can be applied to any channel measuring Voltage, Frequency or Pulse to display readings in a user selected custom unit of measure.

- **Gain:** User selected gain value.
- **Offset:** User selected offset value.
- **Units Label:** User selected label to display.
- **Apply:** Saves the settings.
- **File:** Retrieves a previously saved Engineering Unit setting.
- **Save:** Saves the Engineering Unit setting for future use.
- **Wizard:** Allows the user to set up units by entering the input and output values for low and high scale points. The unit will automatically calculate the gain and offset from these values.
- **Cancel:** Returns the user to the Channel Configuration screen.
Setting Up Engineering Units

Enter the unit of measurement and abbreviation.

Click the **Wizard** button to launch the Engineering Unit Wizard.

Enter the low and high scale point inputs and outputs and click **Apply**.

The gain and offset are automatically set. Click **Save** to save the engineering units to the channel and click **Apply** to apply the changes to current logging session.
**USER INTERFACE**

**Keyboard Function**
When the user taps in any text field within the interface, the keyboard will appear. The numeric keypad appears when the Gain and Offset fields are selected. The keyboard appears when Unit of Measurement and Abbreviation fields are selected.

To prevent the keyboard from obscuring content, the screen will always focus on the selected field and bring it into view. Once the text field is complete, the user can tap anywhere on the screen and the keyboard will disappear from view.

**Alarms**
Users can create one alarm configuration per channel with up to two alarm values per channel (above and below threshold).

- **Above**: Indicates the high reading threshold at which the alarm becomes active.
- **Below**: Indicates the low reading threshold at which the alarm becomes active.
- **Enabled/Disabled**: Tap the button to either enable or disable the text field to enter desired alarm value.
- **Disable All**: Clears the alarm settings.
- **Apply**: Applies the setting to the current channel.
- **Cancel**: Cancels changes and then returns the user to the Channel Configuration screen.
Factory Calibration
The OM-CP-OCTPRO comes with a complete Factory Calibration and provides users the ability to adjust the calibration settings per channel, and roll back to the factory settings at any time. **Note:** For best performance and accuracy, Factory Calibration should be performed at least once every 12 months.

![Factory Calibration](image1)

**Factory Calibration:** Indicates the device is currently in the factory calibrated state.

![User Calibration](image2)

**User Calibration:** Indicates the calibration settings have been modified by the user.

Channel Configuration Overview
An example of a completed channel configuration screen is shown below.

![Channel Configuration](image3)

- **View Wiring Diagram:** Shows how to properly wire the device.
- **Green Channel:** Enabled channel.
- **Orange Channel:** Disabled channel.
- **Linked Channels / Gray Channels:** 3 or 4 wire RTD sensor types can be selected for Channels 1, 3, 5 and 7. This sensor type will also occupy the next sequential channel and will be visually represented with a Link icon as seen between Channels 3 and 4 on the screen to the left.
- **Update:** Once the user has configured the channel settings, this button will apply the current settings to all channels.
- **File:** Loads previously saved configurations.
- **Save:** Saves the current Channel Configuration so it may be loaded and used in the future.
- **Disable All:** Clears the programmed channels to disable all.
- **Cancel:** Cancels user changes and then goes back to the Home screen.

Apply Channel Configuration
Once channels are configured as desired, the user must then select **Update** to use those settings.

A pop-up as shown to the right will confirm that settings have been applied.
USER INTERFACE

Save Configuration Settings
Completed channel configurations can be saved for repeated use. The user can select Save from the channel configuration screen to select a name for the saved settings file and apply them.

Load Configuration Settings
Saved channel configurations can be easily loaded for repeated use. The user can select File from the channel configuration screen to choose from the list of previously saved settings files. Note: Loading a saved settings file will replace the existing configuration.

Wiring Diagram
From the channel configuration screen, the user can select the Wiring Diagram button to display the proper wiring of the unit based on the currently applied configuration. Please note the position of channel 1 in regards to screen orientation.
LOGGING DATA

Start Logging
When Start Logging is selected from the Home screen, the Logging Configuration screen will appear and the user will be prompted to name the data logging session. If the user has not already configured the channels, they will be prompted to configure prior to starting a logging session. The user will be able to configure start time, stop time, and reading rate in addition to naming the logging session.

- **Session Name**: Enter the desired name for the logging session. If no name is given, a unique default name will be assigned (i.e. Session 1).
- **Delayed Start**: Select a Delayed Start time or tap the Start Logging Data button to start immediately.
- **Automatic Stop**: The user has the option of selecting an Automatic Stop time. If no time is selected, the user will use the Stop Logging button on the Home screen to manually stop the device.
- **Reading Rate**: The reading rate will default to 1 minute or use the setting of the last session configuration. Maximum number of readings per session is 1,000,000.
- **Start Logging Data**: Begins logging data immediately.
- **Cancel**: Cancels user changes and returns back to the Home screen.

Delayed Start
Selecting Delayed Start will bring up the following configuration screen.

- **Day**: Using the up and down arrows, the user is able to adjust the day.
- **Hour**: Using the up and down arrows, the user is able to adjust the hour.
- **Minute**: Using the up and down arrows, the user is able to adjust the minute.
- **am/pm**: Using the up and down arrows, the user is able to select am or pm (12-hour clock only).
- **Apply**: Applies the start or stop time settings and returns the user back to the Logging Configuration screen.
- **Cancel**: Returns the user to the Logging Configuration screen.
**Automatic Stop**
Selecting Automatic Stop will bring up the following configuration screen.

- **Day**: Use the up and down arrows to adjust the day.
- **Hour**: Use the up and down arrows to adjust the hour.
- **Minute**: Use the up and down arrows to adjust the minute.
- **am/pm**: Use the up and down arrows to select am or pm (12-hour clock only).
- **Apply**: Applies the start or stop time settings and returns the user back to the Logging Configuration screen.
- **Cancel**: Cancels the start or stop time settings and returns the user to the Logging Configuration screen.

**Reading Rate**
When the user selects Reading Rate, the following configuration screen will appear. Once the desired reading rate is selected, the user must select Apply to use that option, or Cancel to return to the previous screen. See page 27 for available reading rates.
Review Session Details and Start Logging

Once the user selects a Session Name, Start Time, Stop Time and Reading Rate, the screen will look similar as it does below. Once the settings are complete, the user will select Start Logging to begin Logging Mode. After selecting Start Logging, the user will be brought to the Home screen.

Stop Logging

To manually stop a logging session, the user will select the Stop Logging button from the Home screen. Note: Access the Home screen at any time by pressing the Home button.

Device Memory Warning

After selecting Start Logging, if the internal memory of the device is 100% full, the user will be notified with a pop-up warning message and two options to choose from. This warning will also appear if the internal memory of the device reaches 100% capacity while actively logging.

Stop Logging Confirmation

When the user selects Stop Logging, a pop-up screen will emerge prompting the user to confirm the action.
**Real-Time Data**
When Real-Time is selected from the Home screen, the device will display data from all enabled channels and update at the user selected reading rates. The Real-time view is also available from the Current Session menu when the device is actively logging.

- **Current Reading:** Displayed in the center of the gauge.
- **Minimum:** Displayed on the bottom left of each gauge.
- **Maximum:** Displayed on the bottom right of each gauge.
- **Zero:** (Pulse Only) Resets the displayed reading to zero.
- **Scale:** Scales the readings on the screen. Maximum value will be reset to the current value.

**Configuration Warning**
Real-Time data is only available if the device channels are configured.

**Current Session — Graph View**
Select the Current Session button from the Home screen to view the recorded data in various formats, swipe the screen to the left or right to navigate.

- **Graph View**
  - Use the drop down menus at the top to select which channels to view.
  - Touch any point on the graph line to display more detailed information.
  - Triggered alarm events will be visible within the graph.

- **Swipe Options**
  - Swipe left at the top of the screen to go to the tabular data view.
  - Swipe within the graph to scroll through the graph timeline.
VIEWING DATA

Current Session — Tabular View
Select the Current Session button from the Home screen to view the recorded data in various formats, swipe the screen to the left or right to navigate.

- Displays the Minimum, Maximum and Average values for the current session.
- Readings that exceeded user selected thresholds/alarms are displayed as red.
- Scroll vertically to see data timeline in tabular format.
- View four channels at a time.
- Swipe left at the top of the screen to see additional active channels.

Additional Views
Swipe left and right to rotate through the various screens.
Graph View > Tabular Views > Real-Time View > Current Session Overview

Note: Use the swipe navigation of data views for both current and stored sessions.
MANAGING DATA

Data Storage
Selecting the Data Storage icon will bring up the screen pictured below. Stored sessions are displayed in a scrollable list, swipe vertically to browse the list. Session Information includes the name of the session, the start time and date of the session, and the number of readings. The options available on this screen include the following:

- **INT:** Available percentage of internal memory remaining on the device.
- **EXT:** Available percentage of memory remaining on the external USB drive.
- **Number of Sessions:** The total number of stored sessions on the device.
- **Session Information:** Tap on any row to view session specific options.
- **Delete All:** Erases all stored sessions from the internal memory.
- **Eject USB:** Select this button prior to removing the external USB drive.

![Data Storage Screen](image)

Storage Space
Every channel configured is considered a separate reading, so the number of readings divided by the number of channels gives you the readings per channel. Maximum number of readings per session is 1,000,000 or 5,000,000 user selectable in Device Settings.

<table>
<thead>
<tr>
<th>Thermocouple Channels:</th>
<th>Millivolt, Volt, RTD, Thermistor (NTC), Milliamp channels:</th>
<th>Frequency/Counter (Single Channel):</th>
</tr>
</thead>
<tbody>
<tr>
<td>• 1 Hz or slower — 62,000,000 to 150,000,000 readings (depends on number of configured channels) in 1,000,000 or 5,000,000 reading increments.</td>
<td>• 1 Hz or slower — 93,000,000 to 164,000,000 readings (depends on number of configured channels) in 1,000,000 or 5,000,000 reading increments.</td>
<td>• 1 Hz or slower — 93,000,000 readings in 1,000,000 or 5,000,000 reading increments.</td>
</tr>
<tr>
<td>• 4 Hz or faster — 80,000,000 to 150,000,000 readings (depends on number of configured channels) in 1,000,000 or 5,000,000 reading increments.</td>
<td>• 4 Hz or faster — 150,000,000 to 173,000,000 readings (depends on number of configured channels) in 1,000,000 or 5,000,000 reading increments.</td>
<td></td>
</tr>
</tbody>
</table>
**Saved Session Options**
From the Data Storage screen, tap on any row in the list to select a specific session to view options. The Session Options screen features four actions the user can take on any stored session.

- **Copy**: Copies the stored session to an external USB drive. If no USB drive is plugged into the device, the Copy button will not display.
- **View Data**: Views the data of this session in tabular or graph view.
- **View/Edit Note**: Add notes or comments to the session.
- **Delete**: Removes the stored session from the device.

**Note:**
Data saved to external memory will be in .csv file format.

```
• Copy: Copies the stored session to an external USB drive. If no USB drive is plugged into the device, the Copy button will not display.
• View Data: Views the data of this session in tabular or graph view.
• View/Edit Note: Add notes or comments to the session.
• Delete: Removes the stored session from the device.
```

---

**Copy Stored Sessions**
Sessions can be copied from the internal device memory to an external USB drive. When the Copy option is selected, the Copy Stored Session pop-up will appear to confirm the user’s request. **Note:** Data saved to external memory will be in .csv file format.

```
Note: Data can be saved to external memory as .csv and/or .mtb file format (user selectable in System/File Format). Saving as .mtb file format will allow data to be imported into Omega 4 Data Logger Software (version 4.2.13.0 or greater).
```

```
• Copy Data: The session is copied to the external USB drive.
• Cancel: Cancels the copy and takes the user back to the Options screen.
```
MANAGING DATA

**View Data Sessions**
When the View Data option is selected, the user is presented with the Tabular Data view of that session. From this screen the user can swipe left and right to navigate other views of the recorded data from that session (see swipe navigation options on page 17).

![Current Data Readings](image)

**View/Edit Note**
When the View/Edit Note option is selected, the user is presented with a text entry screen. Text entered here is stored as a note associated with a particular session. This can be accessed and edited by users as desired.

![Add Note](image)

**Note Flag**
When a note has been added to a logging session, a notes icon appears in the list of sessions.

**Delete a Note**
To delete a note, edit to remove all text and click **Save**.
Delete Stored Session
When the Delete session option is selected, the user is presented with a pop-up screen confirming the request.

Deleting Stored Data Confirmation
When Delete Data is selected a pop-up screen will display a progress bar and confirm when action is complete. After data is successfully removed the user will be returned to the Data Storage screen.

Warning: Deleting a session is a permanent action.

Delete All
If a user selects the Delete All option, they will be presented with a confirmation screen. Selecting Cancel will return the user to the Data Storage screen and the stored data will not be deleted.
No Stored Sessions
Before first use or after all data has been deleted, the Data Storage screen on the device will resemble the screen shown below.
Device Settings
When the System button is selected from the Home screen, the user is presented with options, preferences and information as shown below. The System panel displays an overview of information specific to the device including:

<table>
<thead>
<tr>
<th>System Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hardware Version: D.4.0.A.4.0</td>
</tr>
<tr>
<td>Software Version: K.5.9.D.4.3.A.4.0</td>
</tr>
<tr>
<td>Serial Number: Q60610</td>
</tr>
<tr>
<td>Internal Memory Used &amp; Available: 3.0 MB &amp; 1,853.7 MB</td>
</tr>
<tr>
<td>Number of Stored Sessions: 0</td>
</tr>
<tr>
<td>Factory Calibration Date: 04/24/2018</td>
</tr>
</tbody>
</table>

File Format
Data from the Titan S8 can be saved to external memory in one of two formats.

- **USB Flash File Format**: .csv spreadsheet, .mtb file (for import into Omega 4 Data Logger Software version 4.2.13.0 or greater) or both.
- **Data Logging File Readings Limit**: Choose between 1 million or 5 million file readings limit.

Date & Time
The Date & Time screen will display the current date and time as well as provide the user with 12-Hour or 24-Hour clock options.
Alarms

The Alarms screen provides the user with two Contact Closure options for when an alarm is triggered.

- **Always/Temporary Mute**
- **Contact Closure**: Normally Open / Closed
- **Contact Signal**: Pulse / Latch
- **Status**: Shows if there are any alarms triggered.

Warning: Factory reset will restore the unit to Factory Settings. This will delete all saved sessions and configurations.

### RTD Note (All RTD Configurations)

Temperature Specifications based on ideal 100 Ω PT RTD Complaint with IEC 751(1983) and ITS-90. Accuracy based on 4-wire configuration.

**BATTERY WARNING:** Battery may explode or fire if mistreated. Do not disassemble or dispose of in fire. Do not charge except specified with charging condition. Do not heat above 212 °F, or short circuit. Do not crush or modify.

Specifications subject to change. See Omega’s terms and conditions at www.omega.com.
**SPECIFICATIONS**

### Reading Rate Information

All channels will use the same reading rate. Reading rates will be capped at 4 Hz when a temperature channel is selected.

- 4 KHz (Supports single channel of voltage or current measurement only)
- 2 KHz (Supports single channel of voltage or current measurement only)
- 1 KHz (Supports single channel of voltage or current measurement only)
- 500 Hz (Supports single channel of voltage or current measurement only)
- 250 Hz (Supports single channel of voltage or current measurement only)
- 100 Hz (Supports single channel of voltage or current measurement only)
- 50 Hz (Supports single channel of voltage or current measurement only)
- 25 Hz (Supports single channel of voltage or current measurement only)
- 10 Hz (Supports multiple channels of voltage or current measurement only)
- 4 Hz

- 24 Hours

### Measurement Accuracy

- At room temperature (25 °C ±10 °C) after 60 minute warm-up period.
- Temperature calibrated accuracy is thermocouple dependent.
- Accuracy does not include Cold Junction Compensation (CJC). CJC error: ±1.5 °C

OMEGA ENGINEERING, INC. warrants this unit to be free of defects in materials and workmanship for a period of **13 months** from date of purchase. OMEGA’s WARRANTY adds an additional one (1) month grace period to the normal **one (1) year product warranty** to cover handling and shipping time. This ensures that OMEGA’s customers receive maximum coverage on each product.

If the unit malfunctions, it must be returned to the factory for evaluation. OMEGA’s Customer Service Department will issue an Authorized Return (AR) number immediately upon phone or written request. Upon examination by OMEGA, if the unit is found to be defective, it will be repaired or replaced at no charge. OMEGA’s WARRANTY does not apply to defects resulting from any action of the purchaser, including but not limited to mishandling, improper interfacing, operation outside of design limits, improper repair, or unauthorized modification. This WARRANTY is VOID if the unit shows evidence of having been tampered with or shows evidence of having been damaged as a result of excessive corrosion; or current, heat, moisture or vibration; improper specification; misapplication; misuse or other operating conditions outside of OMEGA’s control. Components in which wear is not warranted, include but are not limited to contact points, fuses, and triacs.

OMEGA is pleased to offer suggestions on the use of its various products. However, OMEGA neither assumes responsibility for any omissions or errors nor assumes liability for any damages that result from the use of its products in accordance with information provided by OMEGA, either verbal or written. OMEGA warrants only that the parts manufactured by the company will be as specified and free of defects. OMEGA MAKES NO OTHER WARRANTIES OR REPRESENTATIONS OF ANY KIND WHATSOEVER, EXPRESSED OR IMPLIED, EXCEPT THAT OF TITLE, AND ALL IMPLIED WARRANTIES INCLUDING ANY WARRANTY OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE HEREBY DISCLAIMED. LIMITATION OF LIABILITY: The remedies of purchaser set forth herein are exclusive, and the total liability of OMEGA with respect to this order, whether based on contract, warranty, negligence, indemnification, strict liability or otherwise, shall not exceed the purchase price of the component upon which liability is based. In no event shall OMEGA be liable for consequential, incidental or special damages.

CONDITIONS: Equipment sold by OMEGA is not intended to be used, nor shall it be used: (1) as a “Basic Component” under 10 CFR 21 (NRC), used in or with any nuclear installation or activity; or (2) in medical applications or used on humans. Should any Product(s) be used in or with any nuclear installation or activity, medical application, used on humans, or misused in any way, OMEGA assumes no responsibility as set forth in our basic WARRANTY/DISCLAIMER language, and, additionally, purchaser will indemnify OMEGA and hold OMEGA harmless from any liability or damage whatsoever arising out of the use of the Product(s) in such a manner.

**RETURN REQUESTS/INQUIRIES**

Direct all warranty and repair requests/inquiries to the OMEGA Customer Service Department. **BEFORE RETURNING ANY PRODUCT(S) TO OMEGA, PURCHASER MUST OBTAIN AN AUTHORIZED RETURN (AR) NUMBER FROM OMEGA’S CUSTOMER SERVICE DEPARTMENT (IN ORDER TO AVOID PROCESSING DELAYS).** The assigned AR number should then be marked on the outside of the return package and on any correspondence.

The purchaser is responsible for shipping charges, freight, insurance and proper packaging to prevent breakage in transit.

FOR **WARRANTY** RETURNS, please have the following information available **BEFORE contacting OMEGA:**

1. Purchase Order number under which the product was PURCHASED,
2. Model and serial number of the product under warranty, and
3. Repair instructions and/or specific problems relative to the product.

OMEGA’s policy is to make running changes, not model changes, whenever an improvement is possible. This affords our customers the latest in technology and engineering.

TEMPERATURE
- Thermocouple, RTD & Thermistor Probes, Connectors, Panels & Assemblies
- Wire: Thermocouple, RTD & Thermistor
- Calibrators & Ice Point References
- Recorders, Controllers & Process Monitors
- Infrared Pyrometers

PRESSURE, STRAIN AND FORCE
- Transducers & Strain Gages
- Load Cells & Pressure Gages
- Displacement Transducers
- Instrumentation & Accessories

FLOW/LEVEL
- Rotameters, Gas Mass Flowmeters & Flow Computers
- Air Velocity Indicators
- Turbine / Paddlewheel Systems
- Totalizers & Batch Controllers

pH/CONDUCTIVITY
- pH Electrodes, Testers & Accessories
- Benchtop / Laboratory Meters
- Controllers, Calibrators, Simulators & Pumps
- Industrial pH & Conductivity Equipment

DATA ACQUISITION
- Communications-Based Acquisition Systems
- Data Logging Systems
- Wireless Sensors, Transmitters, & Receivers
- Signal Conditioners
- Data Acquisition Software

HEATERS
- Heating Cable
- Cartridge & Strip Heaters
- Immersion & Band Heaters
- Flexible Heaters
- Laboratory Heaters

ENVIRONMENTAL MONITORING AND CONTROL
- Metering & Control Instrumentation
- Refractometers
- Pumps & Tubing
- Air, Soil & Water Monitors
- Industrial Water & Wastewater Treatment
- pH, Conductivity & Dissolved Oxygen Instruments
