Safety Warnings and IEC Symbols

This device is marked with international safety and hazard symbols in accordance with IEC 1010. It is important to read and follow all precautions and instructions in this manual before operating or commissioning this device as it contains important information relating to safety and EMC. Failure to follow all safety precautions may result in injury and or damage to your calibrator.

Caution and Safety Information

- If the equipment is used in a manner not specified in this manual, the protection provided by the equipment may be impaired.
- The installation category is one (1).
- There are no user replaceable fuses in this product.
- The output terminals of this product are for use with equipment (digital meters, chart recorders, etc.) which have no accessible five parts. Such equipment should comply with all the applicable safety requirements.
- Do not operate the equipment in flammable or explosive environments.
- All connections to the thermometer should be made via a shielded cable, 24 AWG stranded wire with the following ratings: 300V, 105°C (221°F), PVC insulation.
- Power must be disconnected before making any electrical connections.
- The power supply used to power the thermometer should be VDE or UL approved with the following ratings: 12 to 24 Vdc @150 mA with overload protection of 500 mA.
Section 1 - Introduction

The low cost OS101E mini-infrared transmitter provides non-contact temperature measurement for industrial applications. The unit measures a temperature range of -18 to 538°C (0-1000°F) and provides a linear analog output of either 4-20 mA, 0-5 Vdc, K type TC, 1 mV/°C, or 1 mV/°F.

The new OS102E mini-infrared transmitter has all the functions of OS101E plus a built-in LED display that shows the measured temperature in degrees F or degrees C which is switchable in the field.

The miniature sensor head design 2.5 cm dia. x 6.3 cm Length (1" x 2.5") is ideal for measuring temperature in confined, and hard to reach places. The aluminum sensor head as well as the rugged electronic housing (Die cast Aluminum) are NEMA-4 rated.

The sensor head is connected to the electronic housing via a 1.82 m (6 feet) shielded cable as standard. The unit provides field adjustable alarm output.

Section 2 - Installation

2.1 Unpacking

Remove the packing list and verify that you have received all your equipment. If you have any questions about the shipment, please call Customer Service at:

1-800-622-2378 or 203-359-1660. We can also be reached on the internet: omega.com     e-mail: info@omega.com

When you receive the shipment, inspect the container and equipment for any signs of damage. Note any evidence of rough handling in transit. Immediately report any damage to the shipping agent.

The carrier will not honor any damage claims unless all the shipping materials are saved for inspection. After examination and removing contents, save packing material and carton in the event reshipment is necessary.

The following items are supplied in the box:

• The infrared transmitter including the sensor head and the 1.82 m (6 feet) shielded cable
• User’s Manual
• Mounting Nut
The following describes the ordering information:

**OS102E or OS101E - MA - **, where

MA - 4/20 mA output
V1 - 0 to 5 Vdc output
K - Thermocouple output, K type
MV - Millivolt output

The following optional accessories are available:

### 2.2 Electrical Connection

**Sensor Head Cable** - The Sensor head is pre-wired to a 1.8 m (6 feet) shielded cable. Plug & lock-in the male connector to the mating female connector on the aluminum housing.

**Power & Output Connection** - Open the cover of the main aluminum housing. Slide the cable through the strain relief and connect the wires to the terminal block on the board as shown in Fig. 2-1. For Alarm output connection, refer to Fig. 2-2.
Section 3 - Operation

3-1 Main Board

The Main Board is shown in Fig. 3-1. Here are the important components on the board:

1. Terminal Block for Power & Output connections
2. Single Turn Potentiometer to adjust Emissivity in tenths (0.x_)
3. Single Turn Potentiometer to adjust Emissivity in hundreds (0._x)
4. Slide switch to select between real time (Normal Operation) and alarm set point
5. Alarm set point adjust, P3
6. °F to °C Jumper setting
3.2 Ambient Temperature

The Sensing head can operate in an ambient temperature of 0 to 70°C (32 to 158°F). The Sensing head in the high temperature model (-HT) can operate in an ambient temperature of 0 to 85°C (32 to 185°F) without any cooling required. The Sensing head can operate up to 200°C (392°F) using the water cool jacket accessory OS100-WC (See Fig. 3-6).

There is a warm up period of 3 minutes after power up. After the warm up period, temperature measurement can be made.

When the ambient temperature around the sensor head changes abruptly, the sensor head goes through thermal shock. It takes a certain amount of time for the sensor head to stabilize to the new ambient temperature. For example, it takes about 30 minutes for the sensor head to stabilize going from 25°C to 50°C (77 to 122°F) ambient temperature.

The sensor head dimensions are shown in Fig. 3-2.
3.3 **Atmospheric Quality**

Environments with smoke, dust, and fumes dirty up the optical lens, and cause erroneous temperature readings. To keep the surface of the optical lens clean, the air purge collar accessory is recommended, OS100-AP, See Fig. 3-7.

3.4 **Measuring Temperature**

Before starting to measure temperature, make sure that the following check list is met:

- The power and analog output connections are made (Fig. 2-1).
- The sensor head is connected to the main unit.
- The slide switch (SW1) on the main board is set to real time (Fig. 3-1).
- The target is larger than the optical field of view of the sensor head (Fig. 3-3).
- The emissivity adjustment on the main board is set properly (Fig. 3-1).
- The output load is within the product specification.

On 102E transmitters, follow these additional steps:

- The temperature display is set to °F or °C (Fig. 3-1)
- For 4-20mA output models, make sure an output load is added, ie. 250 ohms.

![Figure 3-3. Optical Field Of View](image)
3.5 Alarm Setting

The unit provides 0-100% alarm set point adjustment. Here is an example of an alarm setting.

- An OS101E-MA (4/20 mA output), the alarm is to be set at 400°F temperature.
- Connect the alarm output as shown in Fig. 2-2.
- Set the slide switch (SW1) on the main board to the Alarm position.
- Measure the analog output, and set the Potentiometer P3 until the output reads 10.4 mA which is 40% (400°F) of the temperature range.

\[ 10.4 \text{mA} = \frac{40 \times (20-4)}{100} \div 4 \]

- Set the slide switch (SW1) back to the Real Time position.
- If the temperature reading is below the alarm set point, the alarm output stays high, otherwise it goes low.

On the OS102E, you can set the alarm set point directly based on the temperature display.

3.6 Adding Extension Cable

You can add extension cable between the Sensor Head and the main electronic housing up to 15.2 m (50 feet). After adding the extension cable, follow the steps in section to adjust the cable offset.

The following figures show the mounting bracket (OS100-MB), Water cooling jacket (OS100-WC), Air purge collar (OS100-AP), DIN Rail Mounting adapter (OS-100-DR), and the main aluminum enclosure. The DIN Rail Mounting adapter (OS100-DR) is mounted to the bottom of the main aluminum enclosure using two 4-40 screws.

A typical water cool jacket assembly is shown in Fig. 3-7, on the following page.  
1. Mounting Nut  
2. Mounting Bracket  
3. Water Cool Jacket  
4. Sensor Head
3.7 RS-232

Figure 3-5. RS232 PC Interface Connection

OS101E/OS102E RS232 Command Reference:

Note: All commands sent to the OS100E series must be terminated by a carriage return or carriage return and linefeed, and is shown in this document as “CR” and “LF”. Any parameters shown in square brackets “[ ]” are optional. Parameters are separated from commands and from each other by a space “ “. Spaces within commands are shown in this document as “SP”. All commands are case insensitive, meaning any combination of upper/lower case characters are accepted.

In order to communicate with the OS101E/OS102E, the terminal (or PC running a terminal program such as HyperTerminal) must have the following serial communication settings:

- Baud: 19200
- Data Bits: 8
- Parity: None
- Stop Bits: 1
- Handshaking: None

C Command:

Description: - Transmit Target temperature in Deg C (one time).

Syntax: C CR [LF]

Parts: None. There are no parameters for this command.

Remarks: None.

Example:

Assuming target temperature is 125 °C, the following is shown on the PC (terminal) screen after typing “C” and “Enter”:

C
125
**F Command:**

**Description:** Transmit Target temperature in Deg F (one time).

**Syntax:**    F CR [LF]

**Parts:** None. There are no parameters for this command.

**Remarks:** None.

**Example:**

Assuming target temperature is 257 °F, the following is shown on the PC (terminal) screen after typing “F” and “Enter”:

```
F
257
```

**ALARM Command:**

**Description:** Transmit alarm setpoint.

**Syntax:**    ALARM

**Parts:** None. There are no parameters for this command.

**Remarks:**

The purpose of this command is to transmit the current alarm setpoint only. The only method of changing setpoint is by opening the OS101E/OS102E case, and adjusting the alarm setpoint potentiometer.

**Example:**

The following is shown on the PC (terminal) screen after typing “ALARM” and “Enter”:

```
ALARM
537 C
999 F
>`
**VERSION Command:**

**Description:** - Transmit model number, firmware version, and output mode.

**Syntax:** `VERSION CR [LF]`

**Parts:** None. There are no parameters for this command.

**Remarks:**

Units with a display attached will transmit “OS102E” as the model number. The example below shows a unit without a display attached. The firmware version is a six-digit number following the “FW:” shown below. Depending on the model suffix (the first characters immediately following OS101-/OS102-), the “OUTPUT:” will be transmitted as follows:

<table>
<thead>
<tr>
<th>Model Suffix</th>
<th>OUTPUT:</th>
</tr>
</thead>
<tbody>
<tr>
<td>K</td>
<td>TC-K</td>
</tr>
<tr>
<td>MV-C</td>
<td>mV/Deg C</td>
</tr>
<tr>
<td>MV-F</td>
<td>mV/Deg F</td>
</tr>
<tr>
<td>V1</td>
<td>0-5V</td>
</tr>
<tr>
<td>V2</td>
<td>0-10V</td>
</tr>
<tr>
<td>MA</td>
<td>4-20mA</td>
</tr>
</tbody>
</table>

**Example:**

The following is shown on the PC (terminal) screen after typing “VERSION” and “Enter”:

```
>VERSION
OMEGA ENGINEERING
OS101E FW: 061013
OUTPUT: mV/Deg F
>
```

**AMODE Command:**

**Description:** - Set/Transmit alarm activation mode rising/falling.

**Syntax:** `AMODE[SP MODE] CR [LF]`

**Parts:**

MODE (OPTIONAL)

Specifies whether the alarm will activate at the setpoint with rising temperature, or falling temperature. The valid range for this parameter is 0 to 1. A value of 1 will cause the alarm to activate on rising temperature, and 0 will cause activation on falling temperature. If this parameter is not specified, the mode currently set will be transmitted.

**Remarks:**

The default mode for alarm activation is “rising”. The only way to change the activation mode is through the RS232 “AMODE” command.
Example 1:
The following is shown on the PC (terminal) screen after typing “AMODE” and “Enter”. The activation mode is not changed, but it is reported.

AMODE
ALARM MODE SET FOR
RISING TEMP.
>

Example 2:
The following is shown on the PC (terminal) screen after typing “AMODE 0” and “Enter”. The activation mode is changed to “falling” and reported as such.

AMODE 0
ALARM MODE SET FOR
FALLING TEMP.
>

Example 3:
The following is shown on the PC (terminal) screen after typing “AMODE 1” and “Enter”. The activation mode is changed to “rising” and reported as such.

AMODE 1
ALARM MODE SET FOR
RISING TEMP.
>

EMS Command:

Description: - Transmit emissivity setting.

Syntax: EMS CR [LF]

Parts: None. There are no parameters for this command.

Remarks:
The purpose of this command is to transmit the current emissivity setting only. The only method of changing the emissivity setting is by opening the OS101E/OS102E case, and adjusting the emissivity potentiometers.

Example:
The following is shown on the PC (terminal) screen after typing “EMS” and “Enter”:

EMS
E = 0.95
>
CABLE Command:

Description: - Set/Transmit cable length compensation.

Syntax: CABLE[S][P LENGTH] CR [LF]

Parts:

LENGTH (OPTIONAL)

Specifies the total length (in feet) of cable attached between the sensor head and the transmitter box. The valid range for this parameter is 6 to 56. If this parameter is not specified, the length currently set will be transmitted.

Remarks:

The default length is 6 Feet. The only way to change the cable length compensation is through the RS232 “CABLE” command. Additional extension cables can be purchased and added to the system, up to a maximum total length of 56 Feet. As total cable length is changed, an error is introduced. This command is used to compensate for that error. When adding extension cable(s), ensure you specify the total length (i.e., 25 Ft extension + original 6 Ft = 31 Ft) with the CABLE command.

Example 1:

The following is shown on the PC (terminal) screen after typing “CABLE” and “Enter”. The current cable length compensation value is not changed, but it is reported.

CABLE
CABLE LENGTH = 6 FT
>

Example 2:

The following is shown on the PC (terminal) screen after typing “CABLE 31” and “Enter”. The cable length compensation value is changed to “31” and reported as such.

CABLE 31
CABLE LENGTH = 31 FT
>

Example 3:

The following is shown on the PC (terminal) screen after typing “CABLE 200” and “Enter”. The cable length compensation value is changed to “56” because the value 200 is above the maximum length of 56.

CABLE 200
CABLE LENGTH = 56 FT
>

Section 4 – Software

4.1 Software Overview

The OS100-Soft application enables you to communicate with your OS100E Series transmitter on a PC using serial communication. The application has the following capabilities:

- Real-time display of temperature reading.
- Data acquisition and plotting of real-time data.
- Saving acquired data in comma separated values (csv) or tab format for easy importation into spreadsheet programs.
- Data analysis function.
- Printing of graph and data.

4.2 Hardware Hookup

Wire the OS100E unit to the PC as shown in section 3.7, and table 4-1.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Table 4-1 OS100E Serial Communications Wiring Table

4.3 Software Installation

4.3.1 System Requirements

Minimum System Requirements

The following are the minimum recommended system requirements:

- Available serial port or USB to serial port adapter.
- 26 MB Ram
- 280 MB available hard drive space.

Recommended System Configuration

The following system configuration is recommended:
• Windows XP or newer operating system.
• At least 512 MB Ram.
• 280 MB available hard drive space.

### 4.3.2 Software Installation

Insert the OS100-Soft CD into your computer’s CD-Rom drive. The installation program should start up automatically. If it does not start automatically locate and run the Setup.exe file on the CD.

Microsoft .NET framework 2.0 is a pre-requisite for this application and will be automatically installed from the CD if missing this will require you to accept the license agreement prior to proceeding.

![NET Framework 2.0 Eula](image)

Figure 4-1. NET Framework 2.0 Eula

Once the .NET framework is installed or if previously installed on your PC the OS100-Soft installation process begins. The first screen displayed is the welcome screen click “Next>” button to continue. This is followed by the Installation Options Screen, check the box if you would like to install a shortcut for the application on your desktop. Click “Next>” button to continue.

The wizard then takes you to the Installation Folder Screen. Accept the default or choose alternate path then click “Next>” button to continue.
This is followed by the Confirm Installation Screen. If satisfied with click “Next>” button to begin installation, otherwise use “<Back” button to navigate to and change settings as needed.

Figure 4-2. Confirm Installation Screen

A license agreement for the OS100-Soft is next displayed, plead read and select “I agree” option to proceed with installation.
The installation process then begins and the Installation Complete screen is displayed when done. Click “Close” button to finish.
Figure 4-4. Installation in Progress

Figure 4-5. Installation Complete
Congratulations! You have successfully installed the OS100-Soft program and you can now use it to communicate with your OS100E series unit(s).

4.4 Using Software

To run the application click on the desktop shortcut (if present) or access the program from the Start Menu, Start\Programs\OS100-SOFT\OS100-Soft.exe (or select path installed if different).

The software’s online help will guide you through its actual use.
Section 5 - Laser Sight Accessory

5.1 Warning and Cautions

CAUTION:

You may receive harmful laser radiation exposure if you do not adhere to the warnings listed below:

• Use of controls or adjustments or performance of procedures other than those specified here may result in hazardous radiation exposure.
• Do not look at the laser beam coming out of the lens or view directly with optical instruments - eye damage can result.
• Use extreme caution when operating the laser sight accessory
• Never point the laser accessory at a person
• Keep out of the reach of all children

WARNING:

Do not attempt to open the laser sight accessory. There are no user serviceable parts inside.

5.2 Operating the Laser Sight Accessory

The laser sight accessory screws onto the front of the sensor head. This accessory is only used for alignment of the sensor head to the target area. After the alignment process, the accessory has to be removed from the front of the sensor head before temperature measurement.

The laser sight accessory is powered from a small compact battery pack (included with the accessory). Connect the battery pack to the accessory using the cable provided. Aim at the target, and turn on the battery power using the slide switch on the battery pack. Adjust the sensor head position so that the laser beam points to the center of the target area. Turn off the battery pack, and remove the laser sighting accessory from the sensor head. See Fig. 4-1 for reference.
Figure 5-1. Laser Sighting Accessory, OS100-LS

Figure 5-2. Laser Warning Label
Section 6 - Specifications

6.1 General

**Temperature Range:** -18 to 538°C (0 to 1000°F)

**Accuracy @ 22°C (72°F)**
- ± 2% of Rdg. or 2.2°C (4°F) whichever is greater

**Optical Field of View:** 6:1 (Distance/Spot Size)

**Repeatability:** ± 1% of Rdg.

**Spectral Response:** 5 to 14 microns

**Response Time:** 100 msec (0 to 63% of final value)

**Emissivity Range:** 0.1 to 1.00, adjustable

**Operating Ambient Temperature**
- **Main Transmitter:** 0 to 50°C (32 to 122°F)
- **Sensor Head:** 0 to 70°C (32 to 158°F)
- **Sensor Head (-HT Model):** 0 to 85°C (32 to 185°F)
- **Sensor Head with OS100-WC (Water Cooling Jacket):** 0 to 200°C (32 to 392°F)

**Operating Relative Humidity:** Less than 95% RH, non-condensing

**Water Flow Rate for OS100-WC:** 0.25 GPM, room temperature

**Thermal Shock:** About 30 minutes for 25°C abrupt ambient temperature change

**Warm Up Period:** 3 minutes

**Air Flow Rate for OS100-AP:** 1 CFM (0.5 Liters/sec.)

**Power:** 12 to 24 Vdc @ 150 m (0-10 Vdc output requires 14 Vdc)

**Analog Outputs**
- **MV:** 1 mV/°F or 1 mV/°C
- **K:** K Type TC
- **MA:** 4 to 20 mA
- **V1:** 0 to 5 Vdc
- **V2:** 0-10 Vdc

**Output Load requirements**
- **Min. Load (0 to 5Vdc):** 1 K-Ohms
- **Max. Load (4 to 20 mA):** (Supply Power - 4 ) / 20 mA

**Transmitter Housing:** NEMA-4 & IP65, Die Cast Aluminum

**Sensor Head Housing:** NEMA-4; Anodized Aluminum

**Alarm Output:** Open Drain, 100 mA

**Alarm Set Point:** 0 to 100%, Adjustable via P3

**Alarm Deadband:** 12°C (10°F)

**Alarm Indication:** Display Flashing
6.1 **General Con’t.**

Dimensions

**Sensor Head:**
25.4 OD. x 63.5 mm L (1” OD. x 2.5” L)

**Main Housing:**
65.5 W x 30.5 H x 115.3 mm L
(2.58 W x 1.2 H x 4.54” L)

**Weight:**
272 g (0.6 lb)

6.2 **RS232**

**Baud:**
19200

**Data Bits:**
8

**Parity:**
None

**Stop Bits:**
1

**Handshaking:**
None

6.3 **Laser Sight Accessory (OS100-LS)**

**Wavelength (Color):**
630 - 670 nm (Red)

**Operating Distance (Laser Dot):**
Up to 9.1 m (30 ft.)

**Max. Output Optical Power:**
Less than 1 mW at 22°F ambient temperature.

**European Classification:**
Class 2, EN60825-1/11.2001

**Maximum Operating Current:**
45 mA at 3 Vdc

**FDA Classification:**
Complies with 21 CFR 1040.10, Class II Laser Product

**Beam Diameter:**
5 mm

**Beam Divergence:**
< 2 mrad

**Operating Temperature:**
0 to 50°C (32 to 122°F)

**Operating Relative Humidity:**
Less than 95% RH, non-condensing

**Power Switch:**
ON / OFF, Slide switch on the Battery Pack

**Power Indicator:**
Red LED

**Power:**
Battery Pack, 3 Vdc (Consists of two 1.5 Vdc AA size Lithium Batteries)

**Laser Warning Label:**
Located on the head sight circumference

**Identification Label:**
Located on the head sight circumference

**Dimensions:**
38 DIA x 50.8 mm L (1.5” DIA x 2” L)
## Section 7 - Emissivity Table

<table>
<thead>
<tr>
<th>Material</th>
<th>Emissivity (ε)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aluminum – pure highly polished plate</td>
<td>0.04 to 0.06</td>
</tr>
<tr>
<td>Aluminum – heavily oxidized</td>
<td>0.20 to 0.31</td>
</tr>
<tr>
<td>Aluminum – commercial sheet</td>
<td>0.09</td>
</tr>
<tr>
<td>Brass – dull plate</td>
<td>0.22</td>
</tr>
<tr>
<td>Brass – highly polished, 73.2% Cu, 26.7% Zn</td>
<td>0.03</td>
</tr>
<tr>
<td>Chromium – polished</td>
<td>0.08 to 0.36</td>
</tr>
<tr>
<td>Copper – polished</td>
<td>0.05</td>
</tr>
<tr>
<td>Copper – heated at 600°C (1112°F)</td>
<td>0.57</td>
</tr>
<tr>
<td>Gold – pure, highly polished or liquid</td>
<td>0.02 to 0.04</td>
</tr>
<tr>
<td>Iron and steel (excluding stainless) – polished iron</td>
<td>0.14 to 0.38</td>
</tr>
<tr>
<td>Iron and steel (excluding stainless) – polished cast iron</td>
<td>0.21</td>
</tr>
<tr>
<td>Iron and steel (excluding stainless) – polished wrought iron</td>
<td>0.28</td>
</tr>
<tr>
<td>Iron and steel (excluding stainless) – oxidized dull wrought iron</td>
<td>0.94</td>
</tr>
<tr>
<td>Iron and steel (excluding stainless) – rusted iron plate</td>
<td>0.69</td>
</tr>
<tr>
<td>Iron and steel (excluding stainless) – polished steel</td>
<td>0.07</td>
</tr>
<tr>
<td>Iron and steel (excluding stainless) – polished steel oxidized at 600°C (1112°F)</td>
<td>0.79</td>
</tr>
<tr>
<td>Iron and steel (excluding stainless) – rolled sheet steel</td>
<td>0.66</td>
</tr>
<tr>
<td>Lead – gray and oxidized</td>
<td>0.94 to 0.97</td>
</tr>
<tr>
<td>Mercury</td>
<td>0.09 to 0.12</td>
</tr>
<tr>
<td>Molybdenum filament</td>
<td>0.10 to 0.20</td>
</tr>
<tr>
<td>Nickel – polished</td>
<td>0.07</td>
</tr>
<tr>
<td>Nickel – oxidized at 649 to 1254°C (1200°F to 2290°F)</td>
<td>0.59 to 0.86</td>
</tr>
<tr>
<td>Platinum – pure polished plate</td>
<td>0.05 to 0.10</td>
</tr>
<tr>
<td>Platinum – wire</td>
<td>0.07 to 0.18</td>
</tr>
<tr>
<td>Silver – pure and polished</td>
<td>0.02 to 0.03</td>
</tr>
<tr>
<td>Stainless steel – polished</td>
<td>0.07</td>
</tr>
<tr>
<td>Stainless steel – Type 301 at 232 to 942°C (450°F to 1725°F)</td>
<td>0.54 to 0.63</td>
</tr>
<tr>
<td>Tin – bright</td>
<td>0.06</td>
</tr>
<tr>
<td>Tungsten – filament</td>
<td>0.39</td>
</tr>
<tr>
<td>Zinc – polished commercial pure</td>
<td>0.05</td>
</tr>
<tr>
<td>Zinc – galvanized sheet</td>
<td>0.23</td>
</tr>

WARRANTY/DISCLAIMER

OMEGA ENGINEERING, INC. warrants this unit to be free of defects in materials and workmanship for a period of 25 months from date of purchase. OMEGA’s WARRANTY adds an additional one (1) month grace period to the normal two (2) year product warranty to cover handling and shipping time. This ensures that OMEGA’s customers receive maximum coverage on each product.

If the unit malfunctions, it must be returned to the factory for evaluation. OMEGA’s Customer Service Department will issue an Authorized Return (AR) number immediately upon phone or written request. Upon examination by OMEGA, if the unit is found to be defective, it will be repaired or replaced at no charge. OMEGA’s WARRANTY does not apply to defects resulting from any action of the purchaser, including but not limited to mishandling, improper interfacing, operation outside of design limits, improper repair, or unauthorized modification. This WARRANTY is VOID if the unit shows evidence of having been tampered with or shows evidence of having been damaged as a result of excessive corrosion; or current, heat, moisture or vibration; improper specification; misapplication; misuse or other operating conditions outside of OMEGA’s control. Components in which wear is not warranted, include but are not limited to contact points, fuses, and triacs.

OMEGA is pleased to offer suggestions on the use of its various products. However, OMEGA neither assumes responsibility for any omissions or errors nor assumes liability for any damages that result from the use of its products in accordance with information provided by OMEGA, either verbal or written. OMEGA warrants only that the parts manufactured by the company will be as specified and free of defects. OMEGA MAKES NO OTHER WARRANTIES OR REPRESENTATIONS OF ANY KIND WHATSOEVER, EXPRESSED OR IMPLIED, EXCEPT THAT OF TITLE, AND ALL IMPLIED WARRANTIES INCLUDING ANY WARRANTY OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE HEREBY DISCLAIMED. LIMITATION OF LIABILITY: The remedies of purchaser set forth herein are exclusive, and the total liability of OMEGA with respect to this order, whether based on contract, warranty, negligence, indemnification, strict liability or otherwise, shall not exceed the purchase price of the component upon which liability is based. In no event shall OMEGA be liable for consequential, incidental or special damages.

CONDITIONS: Equipment sold by OMEGA is not intended to be used, nor shall it be used: (1) as a “Basic Component” under 10 CFR 21 (NRC), used in or with any nuclear installation or activity; or (2) in medical applications or used on humans. Should any Product(s) be used in or with any nuclear installation or activity, medical application, used on humans, or misused in any way, OMEGA assumes no responsibility as set forth in our basic WARRANTY/DISCLAIMER language, and, additionally, purchaser will indemnify OMEGA and hold OMEGA harmless from any liability or damage whatsoever arising out of the use of the Product(s) in such a manner.

RETURN REQUESTS/INQUIRIES

Direct all warranty and repair requests/inquiries to the OMEGA Customer Service Department. BEFORE RETURNING ANY PRODUCT(S) TO OMEGA, PURCHASER MUST OBTAIN AN AUTHORIZED RETURN (AR) NUMBER FROM OMEGA’S CUSTOMER SERVICE DEPARTMENT (IN ORDER TO AVOID PROCESSING DELAYS). The assigned AR number should then be marked on the outside of the return package and on any correspondence.

The purchaser is responsible for shipping charges, freight, insurance and proper packaging to prevent breakage in transit.

FOR WARRANTY RETURNS, please have the following information available BEFORE contacting OMEGA:
1. Purchase Order number under which the product was PURCHASED,
2. Model and serial number of the product under warranty, and
3. Repair instructions and/or specific problems relative to the product.

OMEKA’s policy is to make running changes, not model changes, whenever an improvement is possible. This affords our customers the latest in technology and engineering.

Where Do I Find Everything I Need for Process Measurement and Control? OMEGA...Of Course!

Shop online at omega.com℠

TEMPERATURE
- Thermocouple, RTD & Thermistor Probes, Connectors, Panels & Assemblies
- Wire: Thermocouple, RTD & Thermistor
- Calibrators & Ice Point References
- Recorders, Controllers & Process Monitors
- Infrared Pyrometers

PRESSURE, STRAIN AND FORCE
- Transducers & Strain Gages
- Load Cells & Pressure Gages
- Displacement Transducers
- Instrumentation & Accessories

FLOW/LEVEL
- Rotameters, Gas Mass Flowmeters & Flow Computers
- Air Velocity Indicators
- Turbine/Paddlewheel Systems
- Totalizers & Batch Controllers

pH/CONDUCTIVITY
- pH Electrodes, Testers & Accessories
- Benchtop/Laboratory Meters
- Controllers, Calibrators, Simulators & Pumps
- Industrial pH & Conductivity Equipment

DATA ACQUISITION
- Data Acquisition & Engineering Software
- Communications-Based Acquisition Systems
- Plug-in Cards for Apple, IBM & Compatibles
- Data Logging Systems
- Recorders, Printers & Plotters

HEATERS
- Heating Cable
- Cartridge & Strip Heaters
- Immersion & Band Heaters
- Flexible Heaters
- Laboratory Heaters

ENVIRONMENTAL MONITORING AND CONTROL
- Metering & Control Instrumentation
- Refractometers
- Pumps & Tubing
- Air, Soil & Water Monitors
- Industrial Water & Wastewater Treatment
- pH, Conductivity & Dissolved Oxygen Instruments
