

Polyfluoroalkyl / Perfluoroalkyl Substances (PFAS) Statement

Overview

The current legislations regarding PFAS include the EU REACH Candidate List which contains numerous declarable PFAS SVHCs, REACH Annex XVII which lists multiple restricted PFAS substances, the California Safe Drinking Water and Toxic Enforcement Act of 1986 (California Proposition 65) which contains three PFAS substances that are subject to CA Prop 65 warning and labeling requirements, the Maine (USA) restriction on intentionally added PFAS and other proposed restrictions such as The Stockholm Convention updates and the Government of Canada's proposed restrictions to limit a broad class of PFAS.

Company Statement regarding PFAS

Dwyer Instruments, LLC, Omega Engineering, Inc., Automation Components, Inc., Miljoco-Weiss, LLC and Universal Flow Monitors (hereafter collectively referred to as "DwyerOmega") are global leaders in sensing, monitoring and control technologies. As such, DwyerOmega is committed to minimizing the environmental impact (including PFAS) associated with the manufacture of our connector products.

To this end, we have partnered with Source Intelligence (a third-party compliance resource) to evaluate the environmental aspects of our raw material sourcing. We exercise great care to ensure that the raw materials used in our manufacturing process are safe for use and comply with the current applicable regulations regarding the use of PFAS in manufactured products.

Through third-party information gathering projects and research of our supply chain, DwyerOmega has not found any information indicating that PFAS are present or intentionally added during the manufacturing process of our connector products.

As this global regulation continues to evolve regarding reducing and excluding PFAS in manufactured products, DwyerOmega will take the necessary steps to comply with proposed global monitoring and restrictions of use obligations. Should DwyerOmega become aware that PFAS have been added to materials supplied to us, we will work diligently to remove those materials from our supply chain.

Regards,

DwyerOmega Global Product Compliance Department
