Compact Temperature Controllers for Lab Heaters

**CBC990 Series**
- **Bulb and Capillary Controllers**
  - Rugged, Cast Aluminum Case
  - Simple 1-Control Adjustment
  - Ready to Use—No Wiring Necessary, Just Plug In
  - Automatic Control
  - Economical Closed Loop Control
  - 1.2 m (4') Copper Bulb and Capillary

The OMEGALUX® Series CBC controller utilizes a bulb-and-capillary type sensor to control a single-pole, single-throw switch. Once the temperature is set, it is automatically maintained by the controller. The control is housed in a rugged, cast aluminum enclosure and has an easy-to-read dial. No wiring is required, as the heater is plugged into the control unit.

**Applications**
CBC controllers are designed for indoor use to control the temperature of small tanks, drums, pipes or other applications requiring automatic temperature control.

**Specifications**
- Switch: SPST with "off" position
- Connection to Heater: Heater plugs into the receptacle built into the controller
- Receptacle Configuration:
  - 120 V
  - 240 V
- Dimensions: 102 L x 89 W x 79 mm H (4 x 3.5 x 3.125”)

**To Order**

Ordering Example: CBC991-250, compact temperature controller, 66 to 288°C (150 to 550°F) temperature range.

**CPP940 Series**
- **Percentage Controller**
  - Rugged, Cast Aluminum Case
  - Simple 1-Control Adjustment
  - Ready to Use—No Wiring Necessary, Just Plug In

The OMEGALUX® Series CPP percentage controller is a manually adjustable control which provides variable selection of average heater power. The controller varies the proportion of "off" and "on" time of the heater. Thermal characteristics of the heated item will determine the setting of the manually adjustable controller knob. The controller does not use a temperature sensor; therefore, operation requires occasional supervision under changing load conditions.

**Applications**
OMEGALUX® percentage controllers are designed for indoor use to control the temperature of small tanks, laboratory heaters, pipes, and drums in which the control of average power is desired and precise control is not required.

**Specifications**
- Switch: DPST
- Connection to Heater: Heater plugs into the receptacle built into the controller
- Dimensions: See CBC Series above

**CAUTION AND WARNING!**
Fire and electrical shock may result if products are used improperly or installed or used by non-qualified personnel.
