LIQUID FLOW TRANSMITTER AND SWITCH

FSW-9000 Series

High Reliability—No Moving Parts
4 to 20 mA, PNP/NPN (Transistor), or Relay Output
Excellent Low Flow Sensitivity

The FSW-9000 Series is a flow switch monitor that measures the velocity of the flow. It is ideal for use in measurement and control liquid applications. The FSW-9000 Series provides two output options: a 4 to 20 mA analog output and a PNP/NPN output. For the 4 to 20 mA output, the electronics module converts the signal from the probe to a 4 to 20 mA analog output, which can be used to indicate flow rate. For the PNP/NPN output, the measured flow rate is compared to the setpoint value selected by the user and the switch changes state once the setpoint value has been achieved.

The FSW-9000 Series microprocessor based electronics and unique self-calibration program gives the flow switch superior temperature compensation, a fast response time (adjustable from 3 to 10 seconds) and increased long term switch point stability. Even in the event of a power failure, the calibration program will store values for maximum and minimum flows for up to 10 years.

A chain of 8 LEDs gives the user a visual indication of the flow rate as well as setpoint status, and one di-chromatic LED indicates switch point status. In addition, if there is a problem with the unit, the 8 LEDs will flash continuously providing troubleshooting information.

The conical shape of the sensor’s tip means that the probe can be installed at almost any angle in the pipe and that if the probe is misaligned, accuracy will not be affected. The sensing element and connection of the FSW-9000 Series are made with 316 SS and the standard enclosure is glass-filled nylon. The FSW-9000 Series can be made with a great variety of process connections such as threaded, flange, or sanitary and is also available in an aluminum enclosure for hazardous environments. Intrinsic safety barriers required for explosion proof areas.

Measuring Ranges for FSW-9000 Series

The FSW-9000 Series nominal measuring range is 0.04 to 2.0 m/s. The switch can be set to trip at any value in this range. To calculate the velocity for your application, use the following simple formula:

\[ V = \frac{1.27 \times Q}{D^2} \]

Q = Flow rate in meters per second
D = Pipe internal diameter in meters
V = Fluid velocity in meters per second

Please note that the 4 to 20 mA option is scaled over 0 to 2.0 m/s

The FSW-90-R is very similar to the FSW-9212 Series with one main difference: The sensor is separate from the electronics and it does not have an enclosed housing. This gives the FSW-90-R Series the ability to be installed in very small pipes and be remotely controlled by the FSCN-91 relay. The FSW-90-R Series is the ideal solution when there is not a lot of space to install even a compact unit or when there is a need for a mounted relay. In addition, the conical shape of the sensor’s tip allows the probe to be installed at almost any angle in the pipe, and if it is misaligned, accuracy will not be affected. The FSW-90-R is made with 316 SS. FSCN-91 relay can operate with DC or AC supply voltage and provides an analog 4 to 20 mA and SPDT output. The FSCN-91 enclosure is made with ABS and can be mounted on a DIN rail or by using 2 fixing screws.
**SPECIFICATIONS**

**Accuracy:** ±5% of setpoint  
**Repeatability:** ±1% of setpoint  
**Power Supply:** FSW-900-R: 85 to 240 Vac, 50/60 Hz or 24 Vdc ±10%; FSW-9000: 24 Vdc ±10%  
**Temperature Range:**  
- Process: -20 to 80°C (-4 to 176°F)  
- Sanitary option to 284°F for CIP  
- Operating: -20 to 60°C (-4 to 140°F)  
**Maximum Pressure:** 300 bar (4351 psi)  
**Protection Class:** NEMA-4 (IP65)  
**Wetted Materials:** 316 Stainless Steel  
**Enclosure Material:** Glass filled nylon standard; aluminum head optional  

**Process Connection:**  
- ½ to 1½ NPT, Tri-Grip™ (Tri-Clamp® compatible), or flange  

**Output:** FSW-90-R + FSCN-90: relay (SPDT) and 4 to 20 mA; FSW-9000: transistor NPN/PNP (400 mA) and 4 to 20 mA  

**Switch Point Adjustment:** Potentiometer  
**Bar graph:** 8 LED  
**Switch Point Status:**  
- **Red LED:** No flow  
- **Green LED:** Flow  

**Response Time:** 3 to 10 sec nominal  
**Maximum Start-Up Delay:** 12 seconds  
**Switching Range:** 0.04 m/s to 2 m/s (water)  

**Dimensions:**  
- **Nylon Head:** 89 H x 64 mm D (3.5 x 2.5”)  
- **Aluminum Head:** 89 H x 108 mm D (3.5 x 4.25”)

**Enclosure (**)**  
1 Glass filled nylon with ½ NPT conduit, cable gland, and 2 m (6.5') cable  
2 Aluminum die cast with ½ NPT conduit  
3 Aluminum die cast with cable gland  

**Insertion Length (***)**  
1 35 mm (1½")  
2 50 mm (2")  
3 75 mm (3")  

Comes complete with operator’s manual.

To order ECTFE/ETFE element coating add suffix “-ETF” to model number, for additional cost.

**Ordering Examples:** FSW-9212, Vac powered switch, and 70A-1, alarm.

FSW-9123, transmitter with ½ NPT thread, aluminum die cast enclosure with ½ NPT conduit, 75 mm (3") insertion length.
