The OMEGA® FP-5070 Mini-Flow sensor is ideal for precision low flow monitoring. The FP-5070 is available in four flow range configurations, covering a very wide range of flows. This allows for easy selection of the range that best fits your application. Typical applications include pilot plant installations, monitoring of critical flows in laboratories, fluid dispensing, bottling lines, and medical flow applications. Other successful applications include monitoring liquid ingredient additions, such as food dyes, in the food processing industry.
