**Benchtop pH Meters Ion Analyzers with RS-232C Interface**

**PHI-359**

- Direct Concentration Readings
- Autocalibration for Ion Concentration and pH
- Recorder Output
- RS-232C Output

The model PHI-359 benchtop analyzer provides both ion concentration and pH measurements. In the ion measuring mode, the PHI-359 displays measurements in direct concentration values, eliminating the need for evaluating mV values. In the ion concentration calibrating mode, the meter calculates the relationship between two standards and stores this in memory; this avoids the need to manually plot a calibration curve.
