Non-Contact Infrared Temperature Sensor
With RS485 MODBUS® RTU Interface

OS210-C4 Series

- Wide Temperature Range from -20 to 500°C (-4 to 932°F)
- Built-In RS485 MODBUS RTU Interface
- Configurable Emissivity Setting and Signal Processing
- Max, Min Average and Instantaneous Readings; Peak or Valley Hold; Reflected Energy Compensation
- 2:1, 15:1, 30:1 or Close Focus Optics
- Fast Response with High Stability
- Stainless Steel Housing, Sealed to IP65
- Quick and Easy Installation
- Optional Air/Water Cooled Housing, Air Purge Collar, Laser Sighting Tool and Mounting Brackets
- Optional DP240 Touch-Screen Terminal for Configuring and Displaying Data from Up to 8 IR Sensors

The OS211 Series is a range of high quality, low cost, compact sensors which measure the temperature of inaccessible or moving objects and materials. They measure temperatures from -20 to 500°C (-4 to 935°F), accurately and consistently, with an outstanding response time of 240 ms. Two-way digital communications via a built-in RS485 MODBUS RTU interface enables the user to adjust the emissivity setting; compensate for reflected energy; apply filtering; select maximum and minimum, average or instantaneous readings; and peak or valley hold processing. Up to 32 sensors can be installed on a single multidrop network. All the IR sensors are fitted with precision germanium lenses for accurate optics. These compact sensors are small enough to fit almost anywhere and their rugged stainless steel housings make them ideal for applications where cleanliness and hygiene are paramount.

The optional DP240 is a 320 x 240 pixel touch screen terminal with a 89 mm (3.5") color TFT display. It allows the user to display data from up to eight infrared sensors and configure each sensor individually. The configuration parameters include emissivity setting, signal averaging, peak or valley hold processing and reflected energy compensation. There are two versions available. Each one provides all of the features above, however, the enhanced DP240-AR also provides analogue transmission for up to 4 sensors, plus two adjustable alarm outputs per sensor for all 8 sensors.
Specifications (OS211)

Temperature Range: -20 to 500°C (-4 to 932°F)

Interface: RS485 MODBUS® RTU

Accuracy: ±1% of reading or ±1°C whichever is greater

Repeatability: ±0.5% of reading or ±0.5°C whichever is greater

Emissivity: 0.2 to 1.0

Response Time, t90: 240 ms (90% response)

Spectral Range: 8 to 14 μm

Supply Voltage: 12 Vdc nominal (6 to 13 Vdc)

Supply Current: 50 mA maximum

Baud Rate: 9600 baud*

Format: 8 data bits, no parity, 1 stop bit*

Mechanical

Construction: Stainless steel

Dimensions: 18 D x 103 mm L (0.70 x 4.05")

Thread Mounting: M16 x 1 mm pitch

Cable Length: 1 m (3.3') (longer lengths available to order)

Weight with Cable: 95 g (3.35 oz)

Environmental Rating:

Rating: IP65

Ambient Temperature: 0 to 70°C (32 to 158°F)

Relative Humidity: 95% max non-condensing

*Other configurations available upon request

Specifications (DP240)

Display: LCD type TFT 320 x 240, 3.5" touch screen resistive

Supply Voltage: 12 to 24 Vdc

Power Consumption: 8 W

Ambient Temperature Range: 0 to 45°C (32 to 113°F)

Relative Humidity: 35 to 95%, non-condensing

Environmental Rating: IP54 front, IP30 housing

Dimensions:

DP240: 140 W x 100 T x 44 mm D

DP240-AR: 140 W x 100 T x 65 mm D

Outputs: (DP240-AR only) 4 analogue outputs, 0 to 10 Vdc, 16 programmable alarm outputs, 12/24 Vdc, 700 mA, (3 a max per block of 8 outputs)

Hardware and Software Data Serial Port EXP1:

RS485 MODBUS RTU interface for infrared sensors

Serial Port COM2: RS485/RS232 interface for second display (read only)

OMEGACARE™ extended warranty program is available for models shown on this page. Ask your sales representative for full details when placing an order. OMEGACARE™ covers parts, labor and equivalent loaners.

Software Data Serial Port EXP1:

RS485 mOdBuS RTU interface for infrared sensors

Serial Port EXP1:

- 4 to 20 mA outputs
- 4 to 20 mA alarm outputs (DP240E only)
- Analogue transmission and alarm outputs (DP240E only)

DP240 Sensor Configuration & Display

Optional DP240 or Other MODBUS Master (Display Only)
Fixed Mounting Bracket
The L-shaped fixed mounting bracket offers a rigid support for the sensor and allows fine adjustment in a single plane.

Adjustable Mounting Bracket
The adjustable mounting bracket consists of a fixed mounting bracket plus another L-shaped bracket. When assembled as shown the adjustable mounting bracket offers a rigid support for the sensor and allows fine adjustment in two planes.

Air Purge Collar
The air purge collar is used to keep dust, fumes, moisture and other contaminants away from the lens. Air flows into the fitting on the side and out of the aperture at the front.

Laser Sighting Tool
The laser sighting tool screws onto the front of the sensor during installation and indicates precisely where the sensor is aiming. Once the sensor has been aimed at the centre of the target and locked in position the laser sighting tool can be removed. The laser is activated by means of a push button on the front of the tool which has a latching mechanism.

*Includes complete with sensor head, 1 m (3.3’) cable, USB cable, software, and operator’s manual.

Ordering Examples: OS151-C4, configurable infrared temperature sensor with 15:1 optics and RS485 MODBUS® RTU interface.
OS211-C4-CE(3), configurable infrared temperature sensor with 2:1 optics and RS485 MODBUS® RTU interface and 3 m (9.8’) of additional extension cable. OCW-3, OMEGACARE® extends standard 2 year warranty to a total 5 years.

Options (Not Field Installable)

<table>
<thead>
<tr>
<th>Suffix</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>-WC</td>
<td>For air/water cooled jacket, add suffix to model number (includes air purge collar), must be ordered with sensor; cannot be retrofitted</td>
</tr>
<tr>
