The HH800A and HH801A handhelds are easy to use Type J and K input thermocouple thermometers. Both feature a large 3½ digit LCD with a maximum reading of 1999.

The HH800A is a single-input model while the HH801A has two inputs and allows for display of $T_1$, $T_2$ or $\Delta T$ ($T_1 - T_2$). Both models feature $T/C$ offset adjustment and are °C/°F switchable, have data storage capability and accept Type J or K thermocouples. The HH801B offers most of the features of the HH801A, but accepts Type J, K, T, and E thermocouples. HH801B also features settable High/Low limits for both inputs and has an integral alarm beeper and three displays for simultaneous viewing of both inputs and the differential.
