

Installation of the Omega Mac Application

- 1) Place the installer file onto your Mac (OmegaMacApplication.dmg).
- 2) Double click on the installer to open the contents.

- 3) Move the application to the Desktop (MacApplication)
- 4) Copy the launch script to the Desktop (launchOmegaApp.command)

To run the application double click on the launch script (launchOmegaApp.command).

Remember that drop-down menus will be at the top of the Mac.
