

'First release version 1.0.2.5 -- no comments.

'11/18/09 Release Notes for Version 1.03.9.1118 new version release

'- New Features.....
'- Added support for Omega's OM-CONV-USB adapter.
'- Reduced the amount of time required to establish a link to a transmitter.
'- Added Omega icon to title bar
'- Added Omega copyright and version at bottom left of form.
'- Modified program to save the last used COM port and Baud Rate, so that the
' next time the program is run, it will default to the values set in the
' last transmitter configured, instead of the first COM port on the list,
' and 9600.
'- Changed the order of presentation in the setup program, so that the
' setup confirmation is the last step, and comes after the license agreement
' as it should, instead of before.
'- Added Omega icon to the entry for "WRS232-USB Wizard" in the "Add/Remove
' Programs" dialog of the Windows Control Panel.

'- Bug Fixes.....
'- Fixed bug that caused program to not recognize transmitter when using
' Omega's OM-CONV-USB adapter.
'- Fixed bug that caused program to disappear from the screen, but remain in
' memory if the "Cancel" button was clicked after a failure to connect.
' This caused the program to not start again, because multiple instances
' of the program are not allowed.
